May 7, 2008

Dear DREME Science Literacy Foundation Friend,

Have you heard? The Dr. Ronald E. McNair Educational (DREME) Science Literacy Foundation presented a fantastic Summer Science Camp in science, technology, engineering and math for teachers and students. We impacted the lives of more than 600 students last year.

Perhaps you saw our campers launch their rockets on ABC, CBS or NBC television stations. Perhaps you read in a local newspaper about our students and teachers dining with astronauts who shared their inspiration for becoming astronauts as well as mission experiences. Perhaps you heard about our expert educators from companies such as NASA and LyondellBasell. **Perhaps you too want to be a part of making a child's "DREME Science Literacy" come true ...this year!**

Make a tax deductible donation today to support the DREME Foundation's Summer Science Camp (5th-8th grade), Teacher Workshop, and college scholarship fund for junior and senior high school students. We will not have our fundraising gala this year so your donations are even more important to us having a successful year in 2008. Join us in inspiring more youth to learn and experience the joy of science, technology, engineering and math.

Click here to view or print the form [DONOR CONTRIBUTION FORM](#) and mail in with your donation today. For more information go to www.dremefoundation.org.

If your gift is received before July 18th, 2008 you will inspire a child this summer to impact tomorrow!

Sincere thanks,

Cheryl M. McNair
Chair
